Cancel: Mandla: February 14, 1901
Subject: missionary's description of a village's health conditions includes the prevalence of malaria
Notes: from a 4-page letter
Price: D

Believe me, the district has a very bad malaria, but I will have it in your care. Address - Mandla, C.B. Demandably. Feb. 14, 1901. I have made a copy of your letter, and I was delighted to get. Please write again. I shall be only too glad to keep a correspondence with you, especially if you are thinking of taking our mission as a field on the malaria. Beside our annual letters there is no paper that especially tells you

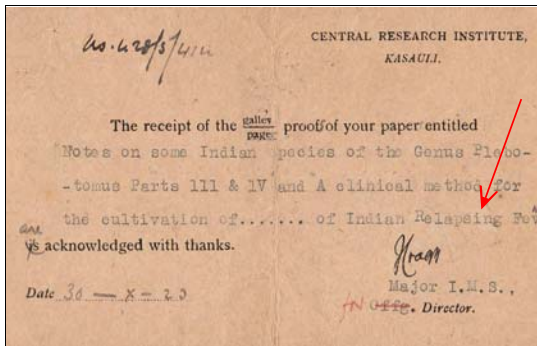

My dear Gordon,

Kaigra
March 21st 1921

Just a card this time, as I have again been laid low with malaria, & with it this ~~is~~ a last card. Hope to write a proper letter next week. We have tramped into Sumner. Even, where in India, the temperature was much above the normal for this month. It has been cold, winter with that abnormal cold some in the beginning of Feb. and now so early has hot weather again.

M. C. B.
