MALARIA ERADICATION

国際マラリア撲滅運動

In the early years that when the English Islands were faced with a serious malaria problem which affected a large portion of the population. Through scientific discovery and medical control programs with WHO technical assistance, malaria has been practically eradicated - only a case was reported in 1961. This is a large measure to the over 1,000,000,000 people of the world which malaria is still a deadly enemy. Malaria can be eradicated by THE WORLD UNITED AGAINST MALARIA.
